

President's Greeting

Corporation is human. It's the mission of a corporation or institution to truly train human resources that contribute to business growth.

We have gathered a wealth of experiences and expertise in the operation, maintenance and construction of thermal power stations at The Chugoku Electric Power Co., Inc. Taking advantage of this wealth, we focus on technical training to improve human resources and also want to help you solve your technical issues through varied areas.

Our company is composed of "Technical Training Department", "Engineering Department", "IT Solutions Department", and "Environmental Solutions Department". These four departments are working hard to increase the satisfaction of our customers.

For details, please browse through our Website or our brochure of technical training. If you have any questions or concerns, please don't hesitate to contact us. We are here to serve you.

Akinori Fujimoto
President
